

Libstats Tableau Dashboard Glossary

Note: This does not replace the libstats data dictionary.
It applies only to the terms used in the Tableau.

Actions

- Also known as clicks or events.
- One line from the log / database.
- Anything a user does: click, open a file, view a table of contents, etc.

Distinct Count

- A count of all unique values within a certain category.
 - Example: A list of values A, A, A, B, B, C has a total of 6 values and a distinct count of 3 values

Unique Publication Titles

- A distinct count of publication titles.
- Publication Title is the journal or collection title.
- Some platforms do not provide sufficient data to parse this information, so these are sometimes null.

Unique Sessions

- A distinct count of EZProxy session IDs.
- A distinct count of logins into EZProxy to access the resource.

Unique Title IDs

- A distinct count of Title IDs.
- Title ID is most often associated with an article title or book title.
- Many platforms do not provide sufficient data to parse this information, so these are often null.

Unique Unit IDs

- A distinct count of items accessed.

Unique Users

- Also known as distinct users or distinct user IPs.
- A distinct count of IP addresses used to access the resource.
- NOTE: User IDs are anonymized, so a user who logs in at home, at Emory, and on the bus will appear to be three different users and we cannot change that.

Resource Type Group

- There are a lot of resource types, so for simplification, I grouped some of them together as such:

Resource Type (group)	Resource Type
ABSTRACT	ABS
ARTICLE	ARTICLE
	ARTICLE_SECTION
	ARTICLES_BUNDLE

BOOK	BOOK
	BOOK_CHAPTER
	BOOK_SECTION
	BOOKSERIE
	CHAPTERS_BUNDLE
REFERENCE	ANALYSIS
	BIO
	ENCYCLOPAEDIA_ENTRY
	REF
SEARCH	SEARCH
SUPPLEMENTAL INFO	
	AUDIO
	CITATION
	CONNECTION
	EXO
	FIGURE
	GRAPH
	HTML
	IMAGE
	MAP
	METADATA
	PREVIEW
	PRINT
	QUESTION
	REPORT
	SUPPL
	TABLE
	VIDEO
	WORKING_PAPER
TOC	TOC
